505-595 BROOKDALE AVE, NORTH YORK CANADA M5M 1S5

Home # 416-346-0513, Work # 905-738-8600 x 186

balochassam@icloud.com

My experience is varied, because I am able to learn and assess a situation quickly. I have experience in lean manufacturing, managing others and taking responsibility for the results.

I want to work for a successful and growing company, where personal integrity and hard work are rewarded. I want to contribute to a company through continued professional development, using my skills and abilities and hard work.

HIGHLIGHTS OF WORK EXPERIENCE

BV GLAZING SYSTEMS (since OCT - 2022)

Currently working

Programming Supervisor

- Coordinate and monitor Scheduling, pricing and technical performance of our products
- Act as a member of the ISO certification team while the company is pursuing ISO accreditation
- Plan, schedule and have the programs executed to the manufacturing plant via my team members

BV GLAZING SYSTEMS (since March - 2014)

Currently working

CNC Programming – Elumatec (additional responsibility)

- Got Training and certified from **Elumatec**
- Program all frame components on daily basis as per daily schedule with all available and required tools and dies.
- Reviewed the machine instructions and determined if these are applicable to the current systems
- Worked hand in hand with the machine operator in running simulations.
- Reviewed the cutting tools to be used.
- Determined the steps to be followed during shaping operations.
- Analyzed the drawings and blueprints submitted by the designing Team.

BV GLAZING SYSTEMS (since March - 2016)

Currently working

CNC Programming – FOM Industries (additional responsibility)

- Got Training and certified from **FOM Italy**
- Program all frame components on daily basis as per daily schedule with all available and required tools and dies.
- Reviewed the machine instructions and determined if these are applicable to the current systems
- Worked hand in hand with the machine operator in running simulations.

- Reviewed the cutting tools to be used.
- Determined the steps to be followed during shaping operations.
- Analyzed the drawings and blueprints submitted by the designing Team.

BV GLAZING SYSTEMS (since May -2012)

July 2015-

CNC Programming Supervisor– Trumpf (Promoted)

- Got Training and certified from **Trumpf USA**
- Program all frame components on daily basis as per daily schedule with all available and required tools and dies.
- Reviewed the machine instructions and determined if these are applicable to the current systems
- Worked hand in hand with the machine operator in running simulations.
- Reviewed the cutting tools to be used.
- Determined the steps to be followed during shaping operations.
- Analyzed the drawings and blueprints submitted by the designing Team.

BV GLAZING SYSTEMS (since Dec -2012)

Oct 2012-June 2015

CNC Programming – Emmegi (additional responsibility)

- Got Training and certified from **Emmegi USA**
- Program all frame components on daily basis as per daily schedule with all available and required tools and dies.
- Reviewed the machine instructions and determined if these are applicable to the current systems
- Worked hand in hand with the machine operator in running simulations.
- Reviewed the cutting tools to be used.
- Determined the steps to be followed during shaping operations.
- Analyzed the drawings and blueprints submitted by the designing Team.

BV GLAZING SYSTEMS (since Dec -2012)

Oct 2012-June 2015

CNC Programming – Emmegi (additional responsibility)

- Got Training and certified from **Emmegi USA**
- Program all frame components on daily basis as per daily schedule with all available and required tools and dies.
- Reviewed the machine instructions and determined if these are applicable to the current systems
- Worked hand in hand with the machine operator in running simulations.
- Reviewed the cutting tools to be used.
- Determined the steps to be followed during shaping operations.
- Analyzed the drawings and blueprints submitted by the designing Team.

BV GLAZING SYSTEMS (since Mar -2008)
